genuine community and spiritual formation.

Values

Relationships

The key ingredient behind this ABF is the encouragement, respect, and building up of each other.

Equipping

We desire that this group invest in building biblical integrity in each other's lives by passing on to others what they know.

Authenticity

A community group works best when the members are open and honest with each other in the group. We hope that people will feel free to simply be who they are.

Confidentiality

Authenticity happens when confidential information shared is kept within the group and not shared with others outside the group.

Availability

Groups are strengthened when members are available to each other through regular attendance and by helping meet each other's needs.

Multiplication

- Hebrews 10:24,25

- What should we practice?
